Welcome to Beechwood Farms Nature Reserve, operated by Audubon Society of Western Pennsylvania.

Over 100 species of birds can be found on the reserve during portions of the year. This checklist provides observers an opportunity to know what birds to expect on the reserve during the seasons and how abundant (or how easy to find) these birds may be.

## Calendar of Seasons

- SP:** March 1st to May 31st  
**S:** June 1st to August 15th  
**F:** August 16th to November 30th  
**W:** December 1st to March 15th

## Relative Species Abundance

- A:** Abundant, almost always found.  
**C:** Common, often found.  
**U:** Uncommon, not certain to be found.  
**R:** Rare, found once or twice in a season.  
**X:** Accidental, may be found once in a few years

*Qualifiers for species abundance will vary depending on observer experience.*
